

Felah Nessrine

Data Science & AI Engineering Student | Machine Learning | NLP | Computer Vision

Monastir, Tunisia | nessrine.felah5@gmail.com | +216 99 246 494 | linkedin.com/in/nessrine-felah-0a6728254

Profile

Data Science & AI Engineering student with a background in Embedded Systems and hands-on experience in Machine Learning, Deep Learning, NLP, Computer Vision, and Data Analysis. Experienced in developing AI-powered applications using Python, TensorFlow, Transformers, RoBERTa, and OpenCV, as well as full-stack solutions. Seeking a 6–8 month PFE internship in Data Science / Artificial Intelligence to contribute to real-world AI projects.

Key Achievements

- Developed a *Lung Disease Detection* system using CNN and Transfer Learning, achieving **93.48%** classification accuracy.
- Built **NutriSmart**, an intelligent nutrition platform integrating interactive maps and healthy location recommendations.
- Designed a *CV Analysis & Job Matching System* using NLP and RoBERTa for automated CV classification and job recommendation.

Projects

TalentSphere — AI Recruitment Platform

2025 – 2026

1st Place — Bal des Projets 2026

- Developed an AI-powered recruitment platform combining NLP, Computer Vision, Speech AI, and Machine Learning.
- Contributed to the CV analysis and job-matching module, including CV classification, semantic matching, and skill-gap analysis.
- Collaborated within a team of 6 Data Scientists/Developers.

CV Analysis & Job Matching System

2025 – 2026

- Developed an NLP system for automatic CV classification.
- Implemented job recommendation logic based on candidate profiles.

GESTION-PARC1 — Vehicle Fleet Management

2025 – 2026

- Developed a web application for SNCFT vehicle fleet management, covering vehicle management, mission management, and fuel consumption monitoring.

MLOps — Salary Prediction & Model Monitoring

2025 – 2026

- End-to-end MLOps project for salary prediction using Machine Learning, experiment tracking, model management, and real-time monitoring.
- Integrated MLflow for experiment tracking, Elasticsearch for metrics storage, and Kibana for model performance visualization.

NutriSmart — Intelligent Web Application

2025

- Developed a smart nutrition platform.
- Designed interactive and responsive user interfaces.

Education

Engineering Degree in Data Science & AI — Esprim School of Engineering

2024 – Present

Bachelor's Degree in Embedded Systems

2021 – 2024

Technological Baccalaureate

2021

Technical Skills

AI & Data Science	Machine Learning, Deep Learning, CNN, Transfer Learning, NLP, Computer Vision, Data Analysis, Data Visualization
Programming Languages	Python, Java, PHP, JavaScript
Databases	MySQL, Oracle SQL, PL/SQL
Frameworks & Tools	TensorFlow, Transformers, RoBERTa, OpenCV, Flask, Streamlit, VS Code, Git / GitHub, IntelliJ IDEA

Languages

Arabic	Native
French	Intermediate
English	Advanced

Interests

Artificial Intelligence, Machine Learning, Data Science, Technology Innovation, Robotics
